INTEGRATED MANUFACTURING CAPABILITY

End-to-end programme support | HARMONGROUP

Harmon Group combines four complementary capabilities that allow customers to source complex manufacturing packages from a single, stable partner.

01

Manufacturing

Multi-axis CNC machining, mill-turn capability and Integrex technology for complex aerospace components.

02

Precision Grinding

Cylindrical, internal and CNC grinding capability supported by continued investment.

03

Surface Treatments

In-house treatments capability with chrome line expansion planned for 2026.

04

Assembly

Assembly and programme support capability strengthened through recent site expansion.
